New website provides insight into Congresswoman Musgrave's work

Congresswoman Marilyn Musgrave (CO-04) recently announced several additions to her official website, www.house.gov/musgrave, which includes in-depth analysis on her legislative priorities, video clips of her speeches before Congress and an e-newsletter subscription.

"I hope to use this website as just another tool in keeping Coloradans informed about my efforts to serve them and make sure their voice is represented in Congress," Musgrave said. "Whether an individual is interested in a particular

legislative issue, or just wants the most recent news, this will be a valuable resource."

Coloradans interested in receiving news on Musgrave's work in Congress may sign up for e-newsletters from the Congresswoman. These bi-monthly messages highlight her latest work throughout Colorado and in the nation's capital.

In addition to the archive of press statements, editorials and breaking news that are currently posted on Musgrave's website, she has now posted web pages highlight-

ing her legislative priorities. The "Legislative Issues" pages contain specific information on her fight to help farmers, families and hardworking taxpayers, as well as reforming the education, social security and health care sectors.

Moreover, Musgrave's website now contains several of her speeches before Congress. Under "Marilyn at Work," visitors to Musgrave's web site can listen to her statements while seeing her on the floor of the House of Representatives.
